

Placement Rate from 2012-2013 Graduate Survey

Each year Marion Technical College administers the Graduate Survey of two-year certificate programs. The survey is administered by mail and telephone surveys approximately six-nine months after graduation. The following information comes from the graduate survey administered to those students completing associate degree requirements during the 2012-2013 academic year. Of the 281, 155 or 55% responded to "Employment and Education related questions". Note: This methodology relies up on students self-reporting once they have left the institution and the overall return rate was obtained through three mailings and follow-up phone calls. (Certificate completer results are available up on request.)

	Public Total	Business Total	Information Total	Engineering Total	Health Total	Arts and Science Total	College Total
Total graduates in program/department	25	46	31	12	152	15	281
