

## WHAT CAN WORKFORCE SOLUTIONS DO FOR YOU?

We understand the impact employees have on your company's performance, productivity and profits. We provide training, employee selection, assessments and certifications, and employment resources. We will work with you to design and select training that improves your employees' skills and leads to success. As one of only 20USO Talent Development Network Centers in Ohio, we have the tools to help you reduce absences, lower turnover and recruitment costs, achieve greater productivity and improve customer satisfaction. We are an approved testing center and offer more than 500 certification exams for employees to demonstrate skills and knowledge. Since 1985, Workforce Solutions has partnered with companies and organizations to help develop a well-trained workforce. To learn more, contact Mike Augenstein, Director of Workforce Solutions at [augensteinm@mtc.edu](mailto:augensteinm@mtc.edu) or by calling 740-386-4138.

## RECENT SUCCESSES

We just completed a successful STNA training for ProMedica here in Marion! We are now working to replicate this training with other long-term care facilities in surrounding areas.

Tami Galloway and Mike Augenstein attended the Ohio Association for Career and Technical Education's PACE/OTDN spring conference in Dublin, OH. Mike presented on a panel with test center experts from around the state on Assessment Center Best Practices. Both were recognized at an awards luncheon. Mike was recognized for re-opening the testing center during Covid and thereby serving people from all over the state as well as 8 other states. Tami was recognized for her many years of service to this organization.

## Online IT Bootcamps through ed2go!

These Bootcamps will prepare you for in-demand, high-paying jobs in the tech sector in six months or less. We are offering three bootcamps:

**AI Machine Learning** – Learn to apply various AI and ML concepts in real-life projects in a variety of job roles, such as AI and ML researchers, entry-level data scientists, AI and ML developers and more. Also, you'll prepare to pass the Microsoft Azure AI certification (MS AI-102) which allows you to work as an AI Engineer.

**Cybersecurity** – Get hands-on training to identify, control, prevent and resolve corporate data breaches and cybersecurity incidents using Python programming, ethical hacking and more. You'll also prepare to pass CompTIA A+, Network+, Security+, CySa+, Pentest+ and EC-Council CEH certification exams.

**Full Stack Web Development** – Learn the skills/knowledge to become a full-stack web developer. You will explore key concepts related to databases for web applications and several front-end to backend programming/scripting languages such as Python, CSS, JavaScript, HTML and React.

When you enroll in a bootcamp, you will get six months of interactive, self-paced IT job training that requires 15-25 hours a week to master the key concepts. In addition, you will have access to five one-hour 1-on-1 coaching sessions. You will complete multiple course projects and a final capstone to help you prepare a professional-level portfolio to show prospective employers.
